Spindle, Stairs & Railings

PRESIDENT'S MESSAGE

“ Welcome to Spindle, Stairs & Railings
Mono Stringer 2023 Catalogue!

Crafted for different generations, we cohere every space with our products.

Design makes our clients feel at home, which is functionally achieved by our construction, labour and skilled trades. In collaboration with the greatest stair companies across Canada and the United States; to create the greatest steel mono stringer stairs in North America.

Adults and children alike can discover the locomotion available within a space from what is dreamt.

With all the greatest artists and their ideas for creation, we introduce to you, the new 2023 Mono Stringer Collection. Modern and contemporary, this minimalist approach offers open space, beautiful flow of light, and the feel that stairs simply float!

We look forward to answering any of your questions.

MONO STRINGERS

We have seven (7) types of stringers that are the foundation, and literal support, to these aesthetic modern designs.

Adrien Mono Stringer

Darcy Mono Stringer

Edren Mono Stringer

Gabriela Stringer

Halliday Cantilever

Mercier Mono Stringer

Reza Mono Stringer

INTRODUCING

The 2023 Collection

The Adrien

A present statement within any space, this *maple tread* looks simply elegant with the *15mm glass* which is structured with *standoffs*. The *rail blank* is with *track lighting*.

The Adrien

The *butcher block maple treads* are framed by a *rail blank with track lighting* and a *black iron horizontal flat bar*.

The *15mm glass* is securely in place with *standoffs*.

The Halliday

A simple modern statement: the *15mm glass* seamlessly lets you look through it to the *maple blank handrail*, which is supported by *metal brackets*. Additionally, the *walnut standoffs* have a solid presence as they peak through the glass for a funky detail.

The Halliday

We see this contemporary look with *floating treads*. The *15mm glass* further pulls together this modern aesthetic. It is important to note that the *glass does not touch the floor*! Pure craftsmanship.

The Darcy

This look is achieved with *metal horizontal* spindles which is finished off with a *square rail bar*. An eye catching detail, that creates diagonal lines which ever so minimally “frame” the *maple treads*.

For continuity, a matching style *black square spigot* has been created to support the glass.

The Darcy

This design comes together with a *cable railing*, which allows an airy feeling combined with *maple treads*. The final touch is the *maple blank rail*.

LOVE IS PATIENT, LOVE IS KIND;
IT DOES NOT ENVY, IT DOES NOT BOAST, IT IS NOT PROUD, IT DOES NOT DISHONOR.
IT IS NOT SELF-SEEKING, IT IS NOT EASILY ANGERED, IT KEEPS NO RECORD OF WRONGS.
LOVE DOES NOT DELIGHT IN EVIL, BUT REJOICES WITH THE TRUTH.
IT ALWAYS PROTECTS, ALWAYS TRUSTS, ALWAYS HOPES, ALWAYS
love never fails
1 CORINTHIANS 13: 4-8

LIVE LAUGH LOVE

The Adrien

Leaning towards an industrial look, the glass stands with *black standoffs* which allows a clear line of sight to the *solid maple treads*.

The *U-Stair* shape has a large landing to safely turn and continue up or down the steps.

Metal brackets complete the look alongside the *black maple blank rod* for the handrail.

The Edren

A slim choice of *10mm glass* lets light flow through a space; these are held in place with *black iron posts with clips*.

Chunky *butcher block treads* are partnered with *rail blanks*.

The Edren

A different version comes together by *10mm glass* being supported by *black square iron with clips*.

Solid maple treads are a light colour choice creating a drastic contrast between handrail and stairway.

The Edren

The matching *walnut treads* flow effortlessly with the *walnut square blank rail*.

Strong vertical lines are achieved by the *black steel posts with clips* supporting *10mm glass*.

The Gabriela

A clean, simple look comes together with *15mm glass* allowing the *solid maple treads* to be the statement here.

The Gabriela

White oak continuous rails, pair elegantly with the solid treads.

15mm glass panels let your eye focus on each step – strong horizontal lines going up and down the staircase.

The Reza

The *wood rail and post* pair excellently with the *solid treads*.

Iron spindles vertically support the handrail; every third spindle has a rectangular shaped detail for added interest to the eye. The spindles match perfectly in colour to the Reza Mono Stringer.

The Gabriela

Oak treads, float from the wall.

The minimal *15mm glass* is easy to clean and on the *flat flooring* has a *black spigot*, with matching clips securing each neighbouring panel.

The Edren

Functional to this space, this look is cohesive because the *solid treads and landing* have a *blank rail* for support.

With grey painted walls, a similar colour palette is highlighted along the staircase with *stainless steel brackets and standoffs*.

15mm glass lets light flow through this long, narrow space.

The Mercier

10mm glass is artistically cut around treads and rails for true continuity along each level.

Stainless steel posts and clips make the metal pop against the natural solid treads, landing and maple hand rail.

The Gabriela

Really like light within your space? These *glass treads* are ever so discrete with the *15mm glass*.

The *white iron rail* 'melts' into the white walls.

The Gabriela

The upper section to this design merges the *15mm glass* with *solid treads*.

Switching it up for a multifunctional space, the *theatre steps* flow allowing creative options. This lower level could be used as a reading nook, display shelves or storage area.

The Darcy

Although incomplete, this in-progress project highlights the *hardwood wrapped tread* which awaits the necessary rail.

The Darcy

Large *15mm glass* panels have been used in this look, which is tied together with *black metal standoffs* and a clean simple, *blank continuous rail*.

The Gabriela

The *maple blank rail* sits effortlessly above the *15mm glass*; which lets your eye 'drop' to the paired *solid treads*.

The Reza (image from page 4)

Comes together with *6mm glass*, which is made taller by combining an *iron rail*, *black iron rod* and *square standoffs*.

The *solid treads and landing* are framed by the exterior window.

The Mercier (image from cover page)

The Mercier (image from page 54)

Also has 6mm glass.

The crafted solid treads also intertwine a stud and winder treads.

The steel square rod is powder coated and supported by square posts with clips.
